

## How to use the plat map files for Stone Brook

The plat maps are public domain documents that are available on the Warren County Auditor's website. They have been arranged here by street name. To see the map for your street, choose the street name document, locate your address in the list. The list contains the parcel number, address and lot numbers associated with the section(s) of the map. The maps have the lot numbers associated with the section map.

The plat maps show various items such as easements and property points.

This is being provided as a courtesy and convenience for the community. All of this information is available on the Auditors website if you want to see the original documents.

Thanks

Stone Brook HOA Board
